## ABOUT

I identify as a Developer with a Product-oriented mindset.

Android app development has been my passion since my student days. I'm drawn to its widespread use, continuous improvements by Google, and its ability to quickly adapt to new technologies.

In my initial role at EA, I worked as a Full stack Developer. demonstrated my ability to learn and adapt quickly by working with Python/Django framework.

Seeking a fresh challenge, I joined 25 Inc., a Startup company and played a pivotal role in developing our first product: gannha.com Android app. We have brought numerous concepts to reality, and expanding our team to include iOS, Backend, and Data specialists. Then I've also worked as a Lead of Mobile team, played an active role in shaping product strategy, giving new ideas, and managing partner relationships, services, and administrative tasks.

# Tâm Huỳnh

## Senior Android Developer

### EXPERIENCE

(Feb 2023 – Now)

#### SENIOR ANDROID DEVELOPER (Freelance)

HIMINTECH - SHAREX APP

##### Skills:

Java/Kotlin, MVVM, SQLite.  
UI/UX, local storage management.

##### Related product:

[ShareX app](#)

##### Experience:

- Work remotely and independently for Phase 4 of the project (not yet released to Store).
- Maintain legacy code.
- Work closely with BA and QC to deliver new features.

(2020 – Now)

#### PRODUCT MANAGER (30% time)

25 INC. TECHNOLOGY INCORPORATE

##### Skills:

BA, wireframe and UI, documentation  
Resource planning, collaboration

##### Related products:

[gannha.com](#) ecosystem  
[signee.asia](#) hardware and support system

##### Experience:

- Manage product team of the gannha.com ecosystem, including mobile, web admin, backend, and hardware app, ensuring seamless collaboration and productivity.
- Provide direct assistance to the CEO in product development, offering strategic insights and planning new concepts to enhance the product.
- Collaborate closely with partners, 3rd-party services, and business customers to efficiently integrate into the product.
- Prepare product roadmap, breaking down features for each sprint, and aligning development goals with company objectives.
- Keep track of the team's daily activities, ensuring consistent progress on the project timelines.

Recently, I transitioned into a new role at 25 Inc. as a Product Manager. I focus 30% of my time on management and still keep working on android programming.

I am a fast and adaptive learner with Android native development foundation and product mindset, so I am well-prepared for a new professional challenge.
