Summary

I identify as a Developer with a Product-oriented mindset.

Android app development has been my passion since my student days. I'm drawn to its widespread use, continuous improvements by Google, and its ability to quickly adapt to new technologies.

In my initial role at EA, I worked as a Fullstack Developer. demonstrated my ability to learn and adapt quickly by working with Python/Django framework. During my time at EA, I made significant contributions to two Django projects, working in collaboration with the team and independently completing a data project, which gave me a well-rounded understanding of end-to-end system processes, covering backend, frontend, database management, and cloud services.

Seeking a fresh challenge, I joined 25 Inc., a Startup company, as its first member. I played a pivotal role in developing our first product: gannha.com app. Over time, we've brought numerous concepts to reality, consistently enhancing the original version, and expanding our team to include iOS, Backend, and Data specialists. Working in a startup has afforded me the opportunity to do more than just programming; I've also played an active role in shaping product strategy, giving new ideas, and managing partner relationships, services, and administrative tasks.

Recently, I transitioned into a new role at 25 Inc. as a Product Manager. I focus less on programming and more on management, track the daily operations of the team, and collaborate closely with the CEO and clients to translate requirements into actionable tasks.

Experience

Product Manager

25 Inc.

Oct 2020 - Present (3 years 1 month)

- * Manage product team of the gannha.com ecosystem, including mobile, web admin, backend, and hardware app, ensuring seamless collaboration and productivity.
- * Provide direct assistance to the CEO in product development, offering strategic insights and planning new concepts to enhance the product.
- * Collaborate closely with partners, 3rd-party services, and business customers to efficiently integrate into the product
- * Prepare product roadmap, breaking down features for each sprint, and aligning development goals with company objectives.
- * Keep track of the team's daily activities, ensuring consistent progress on the project timelines.
- * Product planning, Wireframe, Figma, User story documentation. Flow diagram
- * Feature management by Azure DevOps.

Senior Android Developer

25 Inc.

Jul 2016 - Oct 2022 (6 years 4 months)

- * Lead a team of 6 members, providing clear guidance, and ensuring successful production outcomes.
- * Collaborate with the CEO and cross-functional teams to analyze business requirements, translating them into actionable tasks for the mobile team. Contribute productively beyond development by suggesting and managing new features, and offering valuable UI/UX design insight. Act as a product manager for the app.
- * Strong focus on clean, maintainable, and readable code. Mentored junior team members.
- * Seriously focus on resolving memory leaks and performance issues in a single-page super app, ensuring seamless user experience.

Python/Django Web Developer

East Agile

Feb 2016 - Feb 2017 (1 year 1 month)

- * Work with Django/Python framework, PostgreSQL, and AWS Cloud services. I also work with Python script language and cronjob for a data summarization project.
- * TDD and BDD are a must in East Agile. Quality is our first priority.
- * CI/CD applied for every project.
- * Efficiently working in pairs, in a fully English working environment.

Technical Evangelist - Microsoft Student Partners VietNam

Microsoft

Nov 2014 - Jun 2016 (1 year 8 months)

- * Main trainer, and supporter in many Microsoft student campaigns: WeSpeakCode, HourOfCode, MSP tour,... Host 2 Microsoft training events at the university with more than 70 participants.
- * Get familiar with Windows Phone, Windows 10, and Azure. Have a chance to meet people, and widen connections and knowledge.
- * Certificate for being a dedicated member.

Education

VNUHCM - University of Science

Bachelor's Degree, Computer Software Engineering

2012 - 2016

4 years in the Honors Program

Graduated with final thesis: 9.5/10

Skills

Teamwork • Product Management • Mobile Design • Collaborative Problem Solving • Project Planning
• Presentation Skills • Mentoring • Public Speaking • System Administration • Business Analysis

Imagine Cup 2016 final round - Microsoft VietNam

May 2016

Team VNRoosmary

"Conneet"

An application that acts as a small social network, but is used for connecting people who attend in some events, presentation, etc. Users who want to attend an event can use this app to check in, create their profile and find people who match them - which make people easier to widen their relationship in an event rather than just come in and come out.

Imagine Cup 2015 second round - Microsoft VietNam

May 2015

Team TNT:

"SmartHome for everyone - SHE"

Include a smartphone application and multiple electrical circuits. These circuits then placed inside existed electrical switches to control light, fan, household appliance, etc. Users send the signal via the smartphone app and control the light or set up some auto-mode.

This idea is mainly to turn current traditional living home become smarter but don't replace existing electricity things like switches or power lines.
